COMPANY OVERVIEW

Partnership

Our local implementation partner in Rwanda is World Relief, whose mission is to “*empower the local church to serve the most vulnerable.*” 20 Liters funds three World Relief staff who manage the clean water program, enact hygiene and sanitation training, and who empower locals to maintain the filter systems in their community.

Mission

- **We equip vulnerable people with water, sanitation, and hygiene solutions that are simple, effective, and long-lasting.**
- Our vision is to see a world where all people have access to clean drinking water, sanitation services, and hygiene resources.

Core values

Listening

We seek to listen to and rely on local people to express their needs and to leverage the abundance of resources available in their communities to guide the work.

Honoring

We seek to honor God by serving our neighbors near and far with love, compassion, and respect for the personally held beliefs of individuals from all faith backgrounds.

Partnering

We seek to forge strong partnerships and believe that achieving our mission requires working in collaboration with others, generously sharing our skills and resources.

Sustaining

We seek to create change that positively impacts entire communities for decades with solutions that are sustainable and appropriate to the specific needs of those we serve.

FY25 IMPACT - CLEAN WATER

ANNUAL REPORT 2025

A Bridge Year

- FY25 included the completion of work in the areas of Kagogo and Jarama, and the beginning of work in the sectors of Mugesera and Kinoni.
- World Relief held a “handing off” ceremony with community leaders in Kagogo and Jarama who pledged to continue improving in the areas of sanitation and hygiene while also assuming maintenance of all filters.
- Local government, church, and school leaders in Jarama and Kagogo reported waterborne disease rates dropping from 80% to 30% and continuing to decrease every month. It is estimated that today, the rate is closer to 5%-10%.*

49,574 New Clean Water Recipients in FY25

FY25 IMPACT - SANITATION/HYGIENE

Tippy Tap

Kitchen Garden

Drying Rack

Community Hygiene Clubs

Beginning in the new sectors of Kinoni and Mugesera, we started tracking the progress of Community Hygiene Clubs. Over 3,000 community members have been trained in proper hygiene and sanitation practices and are dedicated to improving health in their villages.

These clubs are led by locals volunteers and show the impact of empowering people to improve their own situations. In addition to the reported data below, these clubs have helped 965 people contribute to medical insurance, completed the construction of 145 bathing facilities, and collected dozens of fresh mattresses and iron sheeting to improve homes.

With World Relief's help, the clubs in Mugesera and Kinoni are participating in a contest to see which sector can help the most people by July 2026. So which team are you: Team Kinoni or Team Mugesera?

FINANCIAL HIGHLIGHTS

20 Liters is incredibly grateful for the faithful supporters who have given the gift of clean water for years. We also welcomed many new donors to our family this year. Our highlights are always the Walk for Water events held in West Michigan and Southern California. This year, each event welcomed 140+ participants.

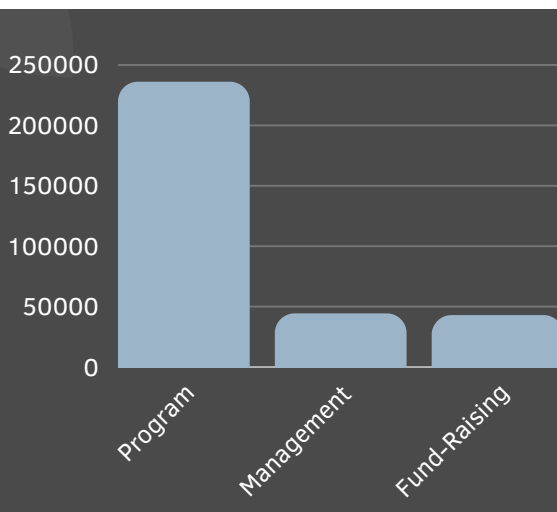

Total Revenue

Total Revenue FY25: \$311,106

Donations: \$277,231

Unrestricted Grants: \$33,875

Total Expense

Total Expenses: \$323,464

- Program Expenses: \$236,119
- Management Expenses: \$44,401
- Fundraising Expenses: \$42,994

Note: Higher expenses are incurred during periods when we send a shipping container (FY25).

SNAPSHOTS FROM RWANDA

Water for Me and You

Manase was diagnosed with hypertension and needed to drink a lot of water for his health. The problem was, the local source, Lake Burera, is very contaminated. In 2024, he was given a 20 Liters SAM3 household filter to make his dirty water clean.

“Now, with the filter, I can drink safe water for myself and even share it with three neighboring families. My health has improved significantly, and my children no longer suffer from waterborne illness,” Manase reports.

But that’s not all.

No longer needing to buy firewood to boil his water, Manase was able to join a World Relief Savings club and saved over 257,500 RWF (\$194). With this money, he has made home improvements and secured a more stable future.

The SAM2 systems at Glory Academy was installed in 2012, and tested in March 2025. The water was still found to be clean and bacteria free!

Glory Academy

When Glory Academy first opened, they faced a constant struggle with waterborne disease. In 2012, 20 Liters delivered a SAM2 filters system to change that. For over 13 years, this filters has served 1,100 students and teachers - giving them clean water to drink at 10:00, noon, and 3:00. Disease rates and missed school have significantly decreased. Ishimwe Evariste, the academy’s founder says, “The filter has truly transformed the well-being and academic performance of our students. May Almighty God bless 20 Liters.”

FUTURE OUTLOOK

Kinoni & Mugesera

FY26 will see us continue our work in Mugesera and Kinoni. Over the next year, our WASH volunteers in Rwanda will sift and wash sand, assemble over 2,000 SAM3 household filters, and install 20 SAM2 community filters and Rain Water Harvest Systems. Your support helps keep our implementation process moving forward.

Shipping Container

In February 2026, we sent our second shipping container to provide filters for the sectors of Kinoni and Mugesera. We are so grateful for the builders, the packers, and our volunteers in Rwanda to help make all this possible. In 2025, 20 Liters volunteers donated more than 750 hours making clean water filters.

THANK YOU

Statistics show there are still over 2 billion people without access to safely managed drinking water. While it's an uphill climb, you are helping us make a difference one step at a time. We are so grateful for everyone who supports this ongoing project of making dirty water clean for the world's most vulnerable. Grace, peace, and gratitude.
